TARGET 2

TARGET 2.1:

Introduce task categories such as "Work," "Personal," and "Shopping" for better organization.

After creating a basic interface for task management now the task was to categorize the task for better organization for this a different column was introduced in which user can select what category of the task is and the task is under that category. In HTML task category was added with code <label for="task-category">Category:</label>

```
<select id="task-category" required>
    <option value="Work">Work</option>
    <option value="Personal">Personal</option>
    <option value="Shopping">Shopping</option>
</select>
```

In javascript codes were written for this to work.

TARGET 2.2:
Allow users to categorize tasks during creation or editing, enhancing task management.

Under this a edit button with pencil icon was introduced so that after user adds the task he can edit it to clarify the mistake made rather than deleting the task.

TARGET 2.3:
Incorporate a minimalist reminder system, visually signaling tasks nearing due dates.

This target was not done properly will be done more good in further days but a basic due date was created with the present date and one exclamation mark showing that due date is near.
